33 HOW YOU CAN HELP

International Medical Corps (UK) is an international humanitarian non-governmental organisation (NGO) with its headquarters in London. The Charity is an independent affiliate of International Medical Corps, a US registered non-profit organisation that shares the same mission. Through an Administrative Services Agreement, International Medical Corps (UK) engages International Medical Corps in the delivery and implementation of its programmes on the ground in accordance with the terms and conditions of its grants.

Throughout this report, projects and their statistics (with the exception of International Medical Corps (UK) financial information) are the results of combined International Medical Corps (UK) and International Medical Corps global efforts.

ETHIOPIA

LEBANON

ANNUAL MESSAGE

In 1984, when International Medical Corps launched its first mission to support people struck by conflict and disaster, our assistance was anchored in an idea, novel for its time: not only provide medical care and deliver medical supplies but also train local populations to provide basic healthcare and other support to their communities. This innovative approach worked.

Decades later, we remain on the front lines, supporting men, women and children in some of the world's most difficult circumstances. In Yemen—where famine threatens millions in the world's worst humanitarian disaster—we are training community health volunteers to screen children for malnutrition and refer severe cases to specialised care as well as raise awareness about vital health practices to parents and other caregivers.

We also continue to educate midwives and nurses in South Sudan, with 384 having graduated since we opened our school there in 2008. Recent data from the World Bank and the United Nations suggest that our approach, in a country that used to have the highest maternal mortality rate in the world, is working—more women survive childbirth today than when South Sudan gained independence.

As a world awash in crisis faces ever-growing challenges, our commitment to training has never been stronger. The passing on of skills is an indispensable ingredient of our mission to help those in great need—no matter where or what the conditions. Our successes, made possible by the generous support of donors, have only reaffirmed our belief that to achieve maximum impact, training must remain the foundation of all of our programmes.

Yet with each success comes a new challenge. For example, our teams in Ituri and North Kivu—heavily populated provinces on the eastern border of the Democratic Republic of the Congo—are placing their lives on the line every day to battle the second largest Ebola outbreak in history. Their commitment has benefitted the many patients we have treated and the more than 1,300 healthcare workers we have trained in infection prevention and control, and enabled almost 1 million screenings for the virus that have been conducted, despite the presence of scores of heavily armed groups in the regions.

And this is just one example. Throughout the 30 countries in which we operate, our teams work in challenging and often dangerous conditions to deliver life-saving healthcare, training and other services, every day. Since our founding, the enormous impact we have had—in both lives saved and suffering eased—convinces us that our commitment to serving those affected by disaster, disease or conflict will only grow stronger.

Yet this is not work we do on our own. The support we receive from multinational and national agencies, organisations and individuals is what makes our work possible—and for that, we remain forever grateful. A heartfelt thank you for your dedication to International Medical Corps UK.

Andrew W. Géczy
Chairman
International Medical Corps UK

Ognjen Radosavljevic
Managing Director
International Medical Corps UK

INTERNATIONAL MEDICAL CORPS UK:

A GLOBAL FIRST RESPONDER

We provide training and deliver emergency healthcare, together with related services, to those affected by conflict, natural disaster or disease. We do this no matter where in the world they may be or what the conditions. We train people in their own communities, providing them with the skills needed to recover, to chart their own path to self-reliance and to shape their own future as they become effective first responders.

SOUTH SUDAN

SPEED SAVES LIVES

INDONESIA

OUR APPROACH

Our Emergency Response Teams deploy fast to assist those in great need—often arriving within hours to reach those even in the most remote, challenging environments. Drawing on experience gained in 35 years of responding to disasters on five continents, our surge capacity includes physicians and nurses trained in emergency medicine supported by specialists in essential healthcare services ranging from mental health and psychosocial support to technical expertise in nutrition, water, sanitation and hygiene—all of it to assist those in need. We do this because speed saves lives in the initial hours following a disaster.

As conditions ease, we stay and partner with survivors to build a better future through training. We strengthen local health systems and work with community leaders, hire and train local staff, develop partnerships and evaluate progress to ensure quality. With a staff that numbers more than 7,000 worldwide, more than 90% of whom are recruited locally, our strategy ensures that the knowledge and tools required to prepare for—and respond to—future emergencies are culturally compatible and remain anchored in the community. We work to ensure that if disaster strikes again, residents themselves can be effective first responders.

OUR PROGRAMMES

Building on 35 years of experience and knowledge, in 2018 we continued to shape programmes that lift communities hit by disaster out of chaos onto a path from relief to self-reliance, saving millions of lives and easing the plight of those who have lost so much.

PHILIPPINES

EMERGENCY RESPONSE AND PREPAREDNESS

In the Democratic Republic of the Congo, we responded to two new Ebola outbreaks during 2018—including one in the country's heavily populated eastern provinces of North Kivu and Ituri that by year's end had become the second largest on record. We continue to run Ebola treatment centres and have built more than 40 screening-and-referral units adjacent to government health centres. Facilities supported by International Medical Corps have conducted almost 1 million screenings for signs of the virus. We also have trained 1,127 health staff in infection prevention and control.

HEALTH SERVICES SUPPORT

In Somalia, we increased healthcare capacity by supporting 149 primary healthcare facilities, 34 mobile clinics and 12 hospitals, providing lifesaving services that included 328,594 primary health consultations.

WOMEN'S AND CHILDREN'S HEALTH

In Sudan's Darfur region, we helped 9,151 women complete a prenatal care cycle of at least four visits to a skilled health professional. Our skilled birth attendants conducted 12,247 deliveries.

NUTRITION AND FOOD SECURITY

In Yemen, where many areas hover on the brink of famine, we supported 65 sites for treatment of moderate acute malnutrition (MAM) and severe acute malnutrition (SAM), including five sites that managed SAM cases with complications. We treated 5,502 children for SAM at outpatient therapeutic programmes, including 306 with complications, and treated some 20,160 MAM cases through targeted supplementary-feeding programmes.

FAMILY AND COMMUNITY HEALTH

In Lebanon, we supported vaccination coverage in areas of armed conflict, administering 48,182 doses of DPT3 (diphtheria-tetanus-pertussis) and 28,616 doses of measles vaccination to infants during their first year of life.

MENTAL HEALTH AND PSYCHOSOCIAL SUPPORT

In Iraq, we provided psychosocial activities for 13,871 people, while providing other mental health and psychosocial support services to 8,597 people.

WATER, SANITATION AND HYGIENE

In Ethiopia, our programmes brought fresh water, safe sanitation and awareness of proper hygiene practices to schools in communities that struggled with all three, changing the lives of more than 13,000 students and their families. Our teams also supported the construction and rehabilitation of 76 latrines and 37 new sources of water, and distributed nearly 12,000 hygiene kits to community residents.

TRAINING UNDERPINS ALL THAT WE DO

TRAINING

35 YEARS OF TRAINING

Throughout our 35-year history, training has been the central thread that runs through International Medical Corps' work. This remained true in 2018, as we passed important skills to those we helped, providing them with the lifesaving skills needed to take their communities further along the path from relief to self-reliance.

We broke new ground on several fronts with our training work in 2018

YEMEN

In a country where more than half of all government health facilities have collapsed under the weight of war, neglect and dwindling resources, our ability to train local national staff and place them in 79 renovated clinics and other health-related entities across Yemen saved countless lives in 2018. We provided training on such topics as integrated management of childhood illnesses, infection prevention, reproductive health, and water and sanitation procedures. With Yemen hovering on the edge of widespread famine, we also trained 943 community health volunteers how to screen children for malnutrition, to refer severe cases to our specialised nutrition services and to deliver health messaging to caregivers. Our trained volunteers reached 248,081 Yemenis with health education messages in 2018.

DEMOCRATIC REPUBLIC OF THE CONGO

To contain the world's second largest Ebola outbreak, we taught local national health workers how to carry out infection prevention and control (IPC) measures, helping trainees learn how to isolate, identify and treat those suspected of carrying the highly contagious and potentially deadly virus while keeping themselves safe from infection. We carried out this work despite challenges on three fronts: providing training in areas where the outbreak had already gained a dangerous foothold, where scores of armed militant groups operated and where resistance by community residents often complicated our efforts.

UNITED STATES

After responding to four disasters on US territory over the past two years, International Medical Corps in 2018 began developing two training courses to better prepare staff and volunteers responding to domestic emergencies. One course, which covers the management of emerging infectious disease threats such as Ebola or Zika virus, trains healthcare facility managers on how best to plan an appropriate facility-wide response and apply the most current research when developing clinical guidance for staff on personal protective equipment, surveillance, isolation and quarantine, outreach and patient education. The second course is a response-planning workshop for specific types of natural disasters, such as hurricanes or major floods, in areas prone to such events. The preparedness training follows our responses in 2017 to Hurricanes Irma and Maria (in Florida and Puerto Rico, respectively) and in 2018 to Hurricanes Florence and Michael (in North Carolina and the Florida Panhandle).

BY THE NUMBERS

In 2018, International Medical Corps responded to the humanitarian needs of millions of people in crisis on four continents.

AMONG THE RESULTS OF OUR WORK:

4.8 MILLION

Medical Consultations

Of these, **1.5 MILLION** involved children under 5.

7.6 MILLION

Direct Beneficiaries

Additionally, we estimate our work in 2018 indirectly benefited **MILLIONS** more residing in areas served by our programmes.

LEBANON

1,576 HEALTHCARE FACILITIES SUPPORTED

Including mobile clinics serving remote rural areas, village health posts and large urban hospitals. Collectively, these facilities form the heart of a nation's healthcare system.

71,810 PARTICIPANTS TRAINED

Training fosters pride, nurtures hope and builds self-reliance in individuals and their communities.

274,782 DOSES OF MEASLES VACCINE AND DPT-3 ADMINISTERED

This reflects the number of children vaccinated against measles and those given the third of three doses required for protection against diphtheria, pertussis and tetanus.

WOMEN'S AND CHILDREN'S HEALTH

A key priority for healthy communities

Supported 62,327 births by skilled birth attendants.

NUTRITION

The foundation of life

75,666 children treated for severe acute malnutrition.

MENTAL HEALTH CARE

A worthwhile investment that pays off in the long run

128,253 individuals participated in psychosocial activities and 28,705 received mental health and/or psychosocial services.

GENDER-BASED VIOLENCE

A violation of fundamental human rights

Provided 25,179 survivors of GBV with psychosocial care and gave appropriate care to 1,193 survivors of rape at International Medical Corps-supported health facilities.

WATER SANITATION AND HYGIENE

The key to good health

Provided 126,506 people with hygiene items or kits, and constructed or rehabilitated 355 water sources.

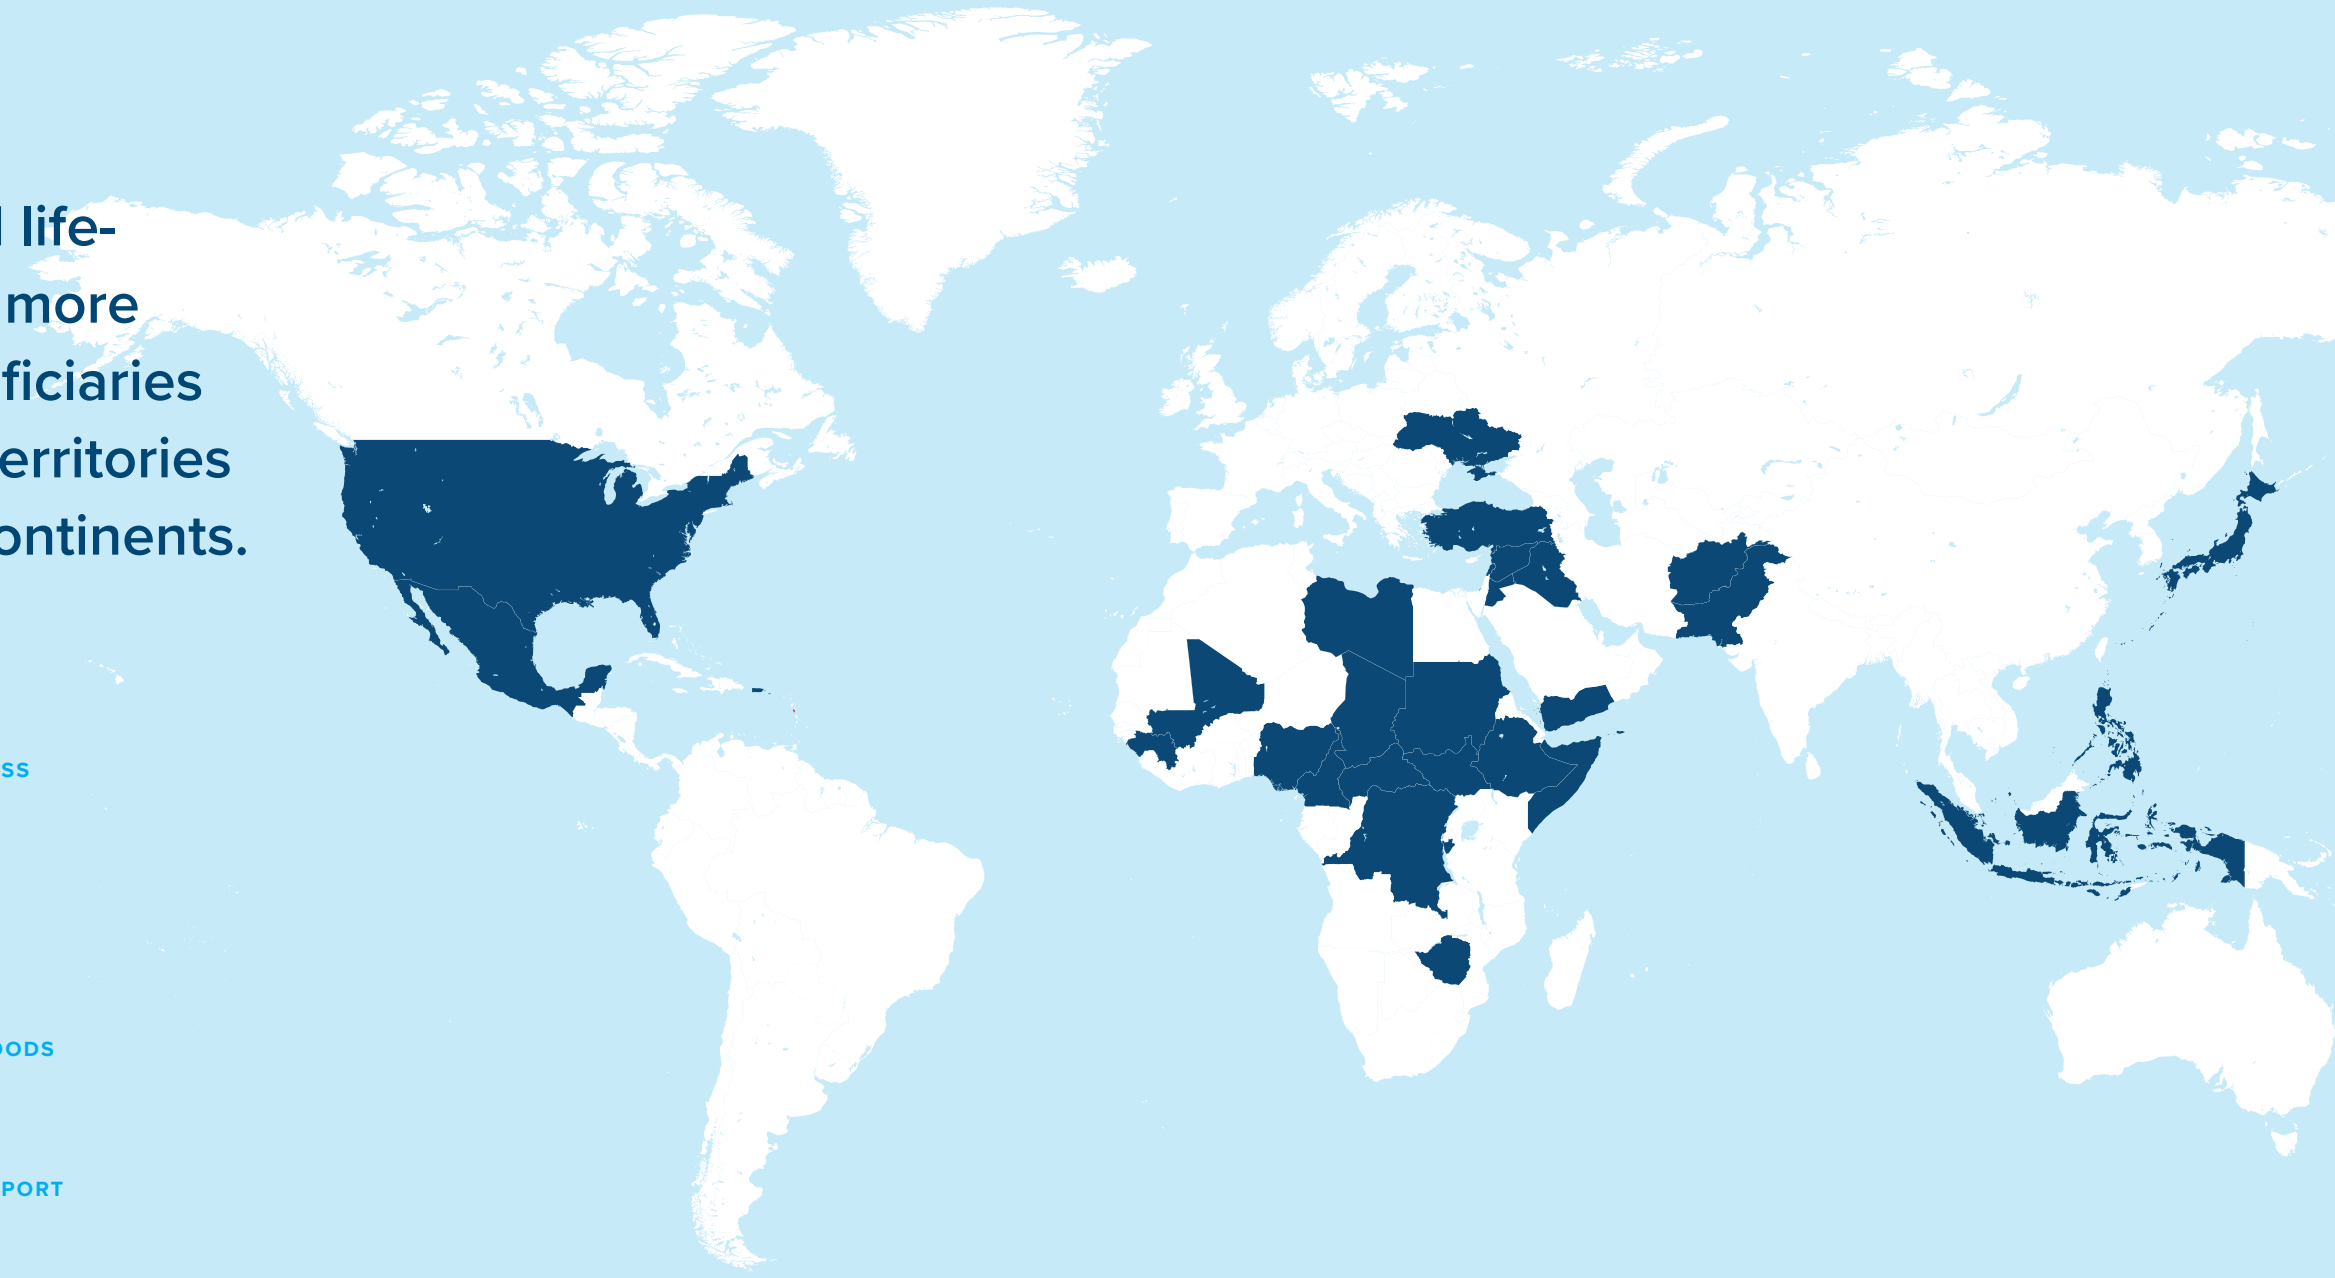

ETHIOPIA

WHERE WE WORK

In 2018, we provided life-saving healthcare to more than 7.6 million beneficiaries in 30 countries and territories spread across four continents.

IN THE MEDIA

International Medical Corps' Global Ambassador, Sienna Miller's trip to Nigeria to support people affected by the Boko Haram crisis, as well as her awareness-raising work at several charity events, resulted in coverage throughout the year in outlets such as Elle UK, The Sun and The Mail Online.

THE IRISH TIMES

The year also saw our assistance to Syrian refugee mothers and their babies in Jordan featured in The Irish Times. Our maternity ward in Irbid—a city in northern Jordan, about 25km south of the Syrian border—supports 70% of all Syrian refugees who require maternity care in Irbid as well as its surroundings.

The Victoria Derbyshire Show—an award-winning BBC current affairs show—interviewed Margaret Traub, International Medical Corps Head of Global Initiatives, about the organisation's response to the devastating flood damage caused by Hurricane Florence.

An op-ed in The Evening Standard, saw former UK Secretary of State for International Development, Penny Mordaunt, referencing International Medical Corps' assistance to Syrian child refugees living in Jordan, as an example of a successful aid programme supporting children who have faced and live with severe trauma.

International Medical Corps was quoted in Thomson Reuters yearly 'Most Neglected Crisis' Poll. The organisation nominated the Lake Chad Basin, where climate change as well as a prolonged insurgency by Boko Haram and the Islamic State have left 11 million needing help.

The Independent highlighted our UK Aid-funded youth empowerment programmes in Jordan, supporting vulnerable Syrian child refugees through child labour prevention as well as the provision of counselling and art therapy.

LEADERSHIP

International Medical Corps Worldwide is a global humanitarian alliance that comprises the resources and capabilities of two independent affiliate organisations: International Medical Corps and International Medical Corps (UK). Together, our mission is to save lives and relieve suffering by providing healthcare and training. With headquarters in the United States and the United Kingdom respectively, we collaborate to maximise resources for the delivery of appropriate relief and development activities.

Unrestricted funds	1,828,890	340,308
	\$24,929,714	\$18,954,012

The above statement of financial activities and balance sheet have been adapted from the full financial statements of International Medical Corps (UK). For a full understanding of the charity's finances, the full International Medical Corps (UK) Annual Report and Accounts are available on International Medical Corps (UK)'s website. The financial statements have been prepared in accordance with applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 (UK Generally Accepted Accounting Practice) and have been audited by Buzacott LLP and unqualified audit opinion was issued.

Global Financial Summary

The resources of International Medical Corps' worldwide global operations—consisting of government and UN grants, private funds, and donated products and services—totalled more than \$274 million in fiscal year 2018. Approximately 91.5% of these resources went directly to programme activities, reflecting International Medical Corps' deep and enduring commitment to fiscal responsibility and efficiency.

Combined Statement of Activities, International Medical Corps and International Medical Corps (UK)*	2018	2017
SUPPORT AND REVENUE		
International Medical Corps (UK)	\$130,037,118	\$148,590,506
International Medical Corps	126,752,541	126,346,216
Total contract and grant support	256,789,659	274,936,722
International Medical Corps (UK)	17,911,044	15,277,301
